

Bunton's Wharf Condominium

Petition Against the Installation of a Pop-up Patio in front of the Coop Wicked Chicken Restaurant

The City of Burlington has approved the concept of pop-up patios in parking locations in front of restaurants in the summer months. Each restaurant has to apply to the Planning Department for approval.

While there is general support for trialing pop-ups, we have a significant safety concern with a pop-up located in front of the new Coop Wicked Chicken Restaurant. Exiting from our parking garage is already difficult, but with a permanent patio, tables and chairs, and potentially umbrellas, such an infrastructure will make it almost impossible. This poses a risk to pedestrians, cyclists and other automobile drivers all travelling down in front of Bunton's Wharf.

We, the undersigned residents of Bunton's Wharf Condominium strongly urge the City of Burlington to reject any such application.
