RE: LaSalle Park Marina (CM-07-18)

We support the public boat ramp, sailing school and the marina, which has coexisted with the Trumpeter Swans for many years and provided a service to the community. However, we do not support the community paying 100% of the cost of the new floating wavebreak.

Most especially when only a handful of participants would benefit.

We would request that funding for this project be done through alternative sources (such as fundraising, or the municipality that is responsible for the land e.g. Hamilton) rather than relying on the taxpayers of Burlington.

This money could be used to host other beneficial programs such as increasing biking trails or making bike lanes safer to use; where many residents could benefit rather than a few, while having a positive effect on the environment.

Thank you for your consideration,

Susan Goyer & James Webster
