**Subject:** 4 million plus-It is not a marina that is grand enough or worth while for any tourist to visit and is too far removed from the City.

Mayor Goldring...will you assure that the four million dollars talked about would be FINAL cost of a floating break wall....would the boaters be required to come up with any funds that would exceed the four million....tell me of one City project that came in at or under the estimated value....none that I know of...What if the Marina can not pay back the City, what then?...Did the City take over running the Marina in order to justify the City providing the funds required to maintain this venture....The City does not need a Marina, it does not bring enough business to the City to justify it's existence, not for the few hundred boaters...It is not a marina that is grand enough or worth while for any tourist to visit.....On the other hand the nature trail and wildlife does bring outside people to the Park....not the Marina...yes there are a few friends and family relatives that have tried to make it appear as if they represent a majority but looking at any responses I have seen about the City spending four million dollars on the Marina.....**the majority are not in favour of this expenditure.** Please do what the majority of the citizens want and do not put the burden of being responsible for a marina on the taxpayers backs. Just because the boaters descend to meetings en mass does not mean they represent the majority of your citizens.

Regards

Glenda Dodd.
