

. . . *Memo*

To: Chair & Members of the Environment, Infrastructure and Community Services Committee

From: Lynn Robichaud, Sr. Sustainability Coordinator, Environment, Infrastructure & Community Services

cc: Allan Magi, Executive Director, Environment, Infrastructure & Community Services

Date: Jan 10, 2020

Re: **Climate Action Plan – Public Feedback & Response (Related to capital works report CW-20-19)**

As requested at the December 2nd Committee of the Whole meeting in relation to capital works report CW-20-19, attached please find a list of all the comments received through the public engagement process to develop the Climate Action Plan. Some of the comments were submitted directly by individuals or by community groups; the majority of comments were submitted through the Get Involved Burlington online survey.

The comments have been grouped by the following themes (in alphabetical order):

- Adaptation & Resiliency
- Advocacy – Senior Levels of Government
- Air Quality
- Buildings & Land Use
- Business & Industry
- Community Engagement
- Electric Mobility
- Energy
- Green Procurement
- Local Food
- Natural Heritage
- Other
- Renewable Energy
- Targets & Monitoring
- Waste
- Water

Staff have noted where those specific areas are included in the Climate Action Plan, essentially related to the seven program areas in the plan:

1. Low Carbon New Buildings
2. Deep Energy Retrofits of Existing Buildings
3. Renewable Energy
4. Electric Mobility & Equipment
5. Integrated Mobility
6. Waste
7. Industry Processes

If the comments/feedback did not relate specifically to the CAP, staff have attempted to provide a response to the comment/feedback and/or identify if the matter is being addressed at another level of government.

I would like to acknowledge that a number of city staff took time to help provide a response to the comments that were received for the Climate Action Plan.

Regards, Lynn
