Re: Metrolinx GO Expansion Project and Public Consultation

Metrolinx has begun the third round of public consultation for the GO Expansion program – an investment program intended to provide 15-minute, all-day rail service across the Greater Golden Horseshoe Region of Ontario. As part of the GO Expansion program, Metrolinx has identified various infrastructure required to achieve service level targets across the network, including a new layover/storage facility in the City of Burlington.

Metrolinx representatives will provide an update on this project and ongoing consultation program as requested by Mayor Meed-Ward.
