Is there a demonstrable safety issue that exists in the current course?

In the recent question about providing 2 examples of meaningful action that has been taken as a result of the feedback it is very disappointing that Glenn was not able to provide any and needed to take it offline. I am surprised at his lack of preparation.

And then to a follow-up question he requested that he needed feedback from those opposed so they could take it into account.

Clearly a lack of transparency, preparation and singular focus on securing the proposal as presented vs true collaboration.

Josh
