

Comments Regarding Burlington's Mobility Hubs: Work Plan for Area Specific Planning

July 2016

The Burlington Development Committee (SDC) supports the proposed Work Plan and the hiring of additional three full-time contract positions for three year duration to develop Area Specific Plans for the Mobility Hubs - City's three GO Stations and the downtown.

This is based on a review of the Burlington's Mobility Hubs: Work Plan for Area Specific Planning PB-48-16 and previous Mobility Hub work.

This work needs to be done promptly to enable the City of Burlington to keep up and in some cases catch up with Development Applications around Mobility Hubs particularly around the Aldershot GO Station and to roll out the Official Plan in a timely and complete manner.

You should consider reviewing how this process might be accelerated.

Sincerely,

Members of the Burlington Sustainable Development Committee
