

City of Burlington Community Survey 2021

Survey Results Presentation

Presented by: MDB Insight

Date: November 2021

The purpose of the 2021 Community Survey was to:

- Measure resident opinions about the City's service delivery
- Guide future actions and decisions of the City of Burlington
- Monitor ongoing progress since the 2015 and 2019 Community Surveys
- Learn opinions about transportation options in Burlington
- Identify preferences regarding communications from and involvement with the City

The survey used the following methods

- The survey was conducted using Computer Aided Telephone Interviews (CATI)
- Respondents were randomly selected from the city's population using a mix of landlines and cell phone numbers
- Numbers were dialed between 5:00pm and 8:30pm, September 13th to October 18th, 2021
- We reached a total of 755 completed interviews, each taking approximately 18 minutes
- The margin of error was +/- 3.6% with a 95% confidence interval
- Responses were weighted based on the population by age and ward in the City of Burlington

Computer Assisted Telephone Interviewing

- Survey questions are programmed into an online VOXCO environment and interview responses are entered directly into the electronic system
- Ensures the statistical representation of the community through random-digit dialing
- Statistical representation allows the accurate measurement of community perceptions using a sub-sample of the population

The survey used several scientific response scales proven to capture metrics accurately.

- 4-point Likert scales, used throughout the survey, remove the mid-point and nudge neutral community members to respond either positively or negatively:
 - Satisfaction Scale: Very Satisfied, Somewhat Satisfied, Somewhat Dissatisfied, Very Dissatisfied
 - The only exception is the 5 point scale used for rating overall quality of life for tracking purposes.
- ‘Select one option’ and ‘select all that apply’ scales are used when respondents should compare multiple items and choose the most relevant/best option
- Open-ended responses are used for exploratory analysis and idea generation

Analysis of findings

Burlington as a Place to Live

89% of respondents rated Burlington as an excellent/ very good place to live in 2021.

Burlington as a Place to Live (n=755)

	2008	2011	2015	2019	2021
