In 2021 iI had to get a tree permit to remove my black walnut tree
I paid \$440.00 for it
May i suggest not asking for money for a tree permit
It should be nothing as it was prior to January 2021
This is an extremely high price for a tree permit
And i had to plant four trees to replace the black walnut
That black walnut destroyed about fifteen trees I have planted in the past
I planted mainly fruit trees
It has cost me about \$80.00 per tree
I want money returned to me because of this extremely poisonous tree
That i had planted over the seventeen years i have lived in Burlington

The black walnut contains a chemical juglone that has a devastating impact on the roots of plants
In humans ingesting even a small amount is toxic and can cause serious poisoning affect

Thank You

Julija
