Hamilton 2030 Commonwealth Games Bid Group  
c/o Mr. Louis Frapporti

Dear Mr. Frapporti,

This letter serves as support in principle to the Hamilton 2030 Commonwealth Bid Group in their development of their competition and training facility plan for both the Games and the legacy from the Games. Specifically, Gymnastics Canada and Gymnastics Ontario are supportive of the work to date with the City of Burlington in respect to the development of a multi-sport training and competition site at 1200 King Road in Burlington.

As a recognized “foundation” sport and activity for all Canadians, Gymnastics is primarily a community-based sport that relies heavily on infrastructure to deliver its services to all Canadians. Given the infrastructure challenges that exist in all regions of Canada, it is very welcoming to see the forward planning that is being considered in respect to effective community recreation and competition facilities in the Burlington region as a legacy to the 2030 Commonwealth Games. Gymnastics Ontario and Gymnastics Canada are very willing to work closely with the planning authorities in the region to ensure that a legacy facility such as this proposed will be properly functional for the community that it is based in. We welcome the opportunity for further dialogue on the facility development plan accordingly.

Sincerely,

A handwritten signature in black ink, appearing to read "Ian Moss".

Ian Moss  
CEO, Gymnastics Canada
