

STRATEGIC DIRECTION 3

A Healthy and Greener City

>> The City of Burlington is a leader in the stewardship of the environment while encouraging healthy lifestyles.

We aspire to have:

- Every Burlington resident live within a 15- to 20-minute walk from parks or green space
- Multi-use parks and green spaces
- Residents grow their own fresh and healthy food
- . Burlington's rural area and waterfront easily accessible
- · Recreation and sports programs widely available to all residents
- · Access to parks and amenities for residents in rural Burlington
- · A healthy, natural heritage system
- Burlington's community and City operations net carbon-neutral
- A healthy thriving urban forest and increased tree canopy
- · A clean, safe and useable waterfront
- Leadership in storm water management and low impact development

The aspirational goals we are moving towards are:

- . City's Operations will be Net Carbon Neutral
- Increase the City's tree canopy to 35%

Important to know:

Aspirational goals were grouped together by similar theme and interconnectivity.

- A healthy thriving urban forest and increased tree canopy
- Residents grow their own fresh and healthy food
- A healthy, natural heritage system
- Multi-use parks and green spaces
- Every Burlington resident live within a 15-20 min walk from parks or green space
- A clean, safe and useable waterfront
- Burlington's community and city operations net carbon neutral
- Leadership in storm water management and low impact development
- Access to parks and amenities for residents in rural Burlington
- Recreation and sports programs widely available to all residents
- Burlington's rural area and waterfront easily accessible

Risks are rated on the basis of confidence scale which speaks to our certainty or uncertainty in our ability to accomplish our objectives/goals.

Responses are only required for those with confidence ratings of moderate, low and very low.

WH.	Very High - We will achieve our strategic objectives within our planned timing horizon and will complete our planned outcomes	M	Moderate - Moderate impact to timing OR outcome or minor impact to timing AND outcome which effects our ability to achieve our strategic objectives
H	High - Minor impact to timing OR outcome which effects our ability to achieve our strategic objectives	0	Low - Significant impact to timing AND outcome which substantially effects our ability to achieve our strategic objectives
		T)	Very Low - We will NOT achieve our strategic objectives within our planned timing horizon and will not complete our planned outcomes

Scenario Analysis: A Healthy and Greener City - Green Growth

A healthy thriving urban forest and increased tree canopy. / Residents grow their own fresh and healthy food.

What Success Looks Like

- Increase the city's tree canopy to 35%
- City achieves the 3/30/300 Concept (see 3 mature trees from their house; 30% canopy coverage at a neighbourhood level; access green space that is 1 hectare or greater, within a 300 m walking distance from their home)
- Residents have easy access to locally grown healthy fresh food, through either growing it themselves or purchasing locally grown food.
- City and neighbourhood associations provide accessible residents' programs on urban gardening (trees, food)
- Urban community space includes elements of community/urban gardens including such things as fruit trees, vegetable plants.
- All residents who want one, have access to community garden plot on public or private land.
- All new developments include elements of green space such as roof top gardens, green roofs, urban trees for resident's use and enjoyment.
- Achieved the OP policy of 1 community garden per 2,500 households.
- Community gardens are a permitted use on all lands public and private.
- Community development/resident associations promote and facilitate community gardens and tree planting.
- Provincial legislation that not only protects but mandates that urban forests are included in the built form (complete streets, tree planting)
- Urban forests are defined, identified and protected in Provincial legislation.
- Right tree, in the right place, in the right way.

Scenario Analysis: A Healthy and Greener City - Parks and Natural Systems

A healthy, natural heritage system. / Multi-use parks and green spaces. / Every Burlington resident live within a 15-20 min walk from parks or green space. / A clean, safe and usable waterfront.

Success

- Highly effective parks and public spaces that are supported and properly maintained.
- Well utilized public parks with amenities that serve the <u>whole</u> community
- Creeks and watercourses are stable and safe environments for passive use by the public.
- The City's waterfront parks and shorelines are stable and safe for active and passive use.
- Suitable management of invasive species in the city's natural areas and woodlots.
- A healthy urban forest rick in biodiversity.
- Proper management and protection of natural and environmentally sensitive areas.
- Parks and green spaces are accessible and interconnected by active transportation options
- Reduction in the likelihood of loss of park/natural areas due to proper flood mitigations.
- Community and developers implement permeable spaces that assist with community flood mitigation.
- Prioritized protection and preservation of city's natural areas
- Infrastructure being built or renewed takes into account climate resilience and green infrastructure
- Successful programs that educate the community about the value and role of our natural heritage systems.

Scenario Analysis: A Healthy and Greener City - Environmental Stewardship

Burlington's community and city operations net carbon neutral. / Leadership in storm water management and low impact development

What Success Looks Like

- City's operations will be net carbon neutral.
- City's operations will be resilient to a changing climate.
- Burlington's fleet vehicles are zero emissions or, carbon credits are purchased for any that are not zero emissions.
- City owned and operated facilities operate with no fossil fuels. All electricity is either produced ourselves (solar) or offset by purchase of renewable energy(carbon) credits.
- Burlington community is resilient to a changing climate and reaches 80% of carbon neutral target by 2040.
- Charging stations for electric vehicles are widely available in city and public lots.
- 75% of homes in Burlington have had deep energy efficiency retrofits
- Over 2.5 million square meters of commercial, industrial and institutional space have completed deep energy efficiency retrofits.
- Installations of renewable energy (i.e. solar, geothermal) is common throughout the community.
- All new development in Burlington includes low impact design features
- Achieve or improve on the recommended water quality guidelines of the Hamilton Harbour Remedial Action Plan and MECP. Particularly, Total Phosphorus of 20 μg/L
- All City capital projects include storm water management and low impact design features (road reconstruction/parks/buildings).
- 100% of new city and community buildings are built to net carbon neutral standards
- Successful implementation of the IMP to support the community in active transportation choices to get to net carbon neutral

Scenario Analysis: A Healthy and Greener City - Recreation Access

Access to parks and amenities for residents in rural Burlington. / Recreation and sports programs widely available to all residents. / Burlington's rural area and waterfront easily accessible.

Success

- Ensuring our rural assets meet the needs of our rural residents.
- Burlington has a rural sports park.
- Agricultural tourism is thriving and brings rural and urban residents together.
- City has a well-defined plan for rural parks and amenities for our rural communities.
- Improved parking and active transportation access to the waterfront including designated trail connections.
- New or improved parking areas to access the Bruce Trail
- The Beachway Master plan has been fully implemented.
- Wayfinding and educational programs for the community with a focus on rural area destinations.
- Programing is reflective of resident interest and is based on the completed PRCMP (Parks and Recreation Cultural Master Plan 2027).
- All rural roadwork includes a paved shoulder for safe walking and cycling.
- Strategy has been developed to gain more public access to allow for a continuous trail along the waterfront.
- One pedestrian overpass is completed in Burlington with the other 5 identified in the Capital Budget and forecast.
- Burlington has a long-term lease or has purchased LaSalle Park enabling construction of a fully accessible boardwalk and look out.
- Proactive and consistent engagement with residents for programming and recreation needs.
- Transit service integrates our urban and rural areas.

4. Analysis & Response: Access to parks and amenities for residents in rural Burlington. / Recreation and sports programs widely available to all residents. / Burlington's rural area and waterfront easily accessible
