

Burlington Planning Committee Meeting; September 18th, 2023 PL-51-23

Notes for presentation to Meeting on Nelson Quarry Expansion

I am opposed to the Nelson Quarry Expansion because of the effects on aquifer depletion and contamination of water quality: as the proposed mining operation proceeds, more water will be removed potentially affecting our residence's water source. I am also very concerned with the heavy vehicle traffic on in our area affecting safety. I would like to ask the City of Burlington to use all necessary resources to oppose this development at the Ontario Land Tribunal Hearing.
