

Motion Memorandum

SUBJECT: Lot #5b Electric Vehicle Charging Stations Installation
– Design Standard Change

TO: Mayor and Members of Council

FROM: Councillor Lisa Kearns, Ward 2

Date to Committee: May 13, 2024

Date to Council: May 21, 2024

Motion for Council to Consider:

Direct staff to install a level 3 EV charging station utilizing a parking spot design that results in no net loss of total parking spots in Lot #5B, located at 391 Brant Street.

Reason:

To maximize the current parking supply in Lot #5b where there will be no loss of parking stalls, recognizing that the changes in design will result in additional construction costs, estimated to be \$10,000 - \$15,000. This addresses the Councillor's request to maintain as much parking supply as possible in Lot #5b.

Outcome Sought:

Adoption of a standard parking design for the installation of the Lot #5b Level 3 electric vehicle charging station, resulting in no loss of parking stalls.

Funding Source:

The downtown parking reserve fund has been confirmed as the funding source for the additional costs cited.

Vision to Focus Alignment:

- Increase economic prosperity and community responsive city growth
- Improve integrated city mobility
- Support sustainable infrastructure and a resilient environment
- Building more citizen engagement, community health and culture

- Deliver customer centric services with a focus on efficiency and technology transformation
