# BURLINGTON DOWNTOWN PARKING PLAN

The City of Burlington is starting a Downtown Parking Plan!

Burlington is evolving from a suburban community to a city. The city is changing, especially in our downtown. As more residents and businesses move to Burlington, this impacts how we choose to get around. Parking plays a crucial role in this. Where you can park, for how long and how much it costs determines if you walk, cycle, take transit, drive or ride share.

The City has retained Stantec to undertake the Burlington Downtown Parking Plan, which will help us determine future parking needs that support growth and land use in the downtown area. Having a strategic downtown parking plan will result in better parking options and financial sustainability.

Public engagement and stakeholder consultation is vital. Opportunities for involvement and input will be provided throughout the project and include public information centers, and engagement workshops with targeted stakeholders. Details on each public information centre will be provided in a separate notice and posted to our project website.

Sign-up to the project website at www.getinvolvedburlington.ca/dtparking **to get project notifications, learn more about the study, and participate in future engagement activities.**

We want to hear about your experiences parking downtown and invite you to fill out the online survey on our website. Comments are welcome throughout the project, if you have any questions, please email dtparking@burlington.ca or contact:

Kaylan Edgcumbe, C.E.T.
